

Unconventional?

Yes.

Burleson Cooke has become the go-to law firm for energy companies with interests in unconventional shale plays. We've worked in all the major formations: **Haynesville, Bakken, Fayetteville, Barnett, Woodford, and Eagle Ford**. And with the opening of our Pittsburgh office, we've become the first Texas firm to bring our capabilities directly to the **Marcellus Shale** region. So if you're looking for unconventional experience and uncommon skills, we're the go-to firm for you.

A Legend, But Not In The Conventional Sense

When it comes to legends, Dr. Claude Cooke – a partner at the energy law firm of Burleson Cooke – is anything but conventional. And for good reason. For over 35 years, he's been a recognized authority on hydraulic fracturing, an essential technology used to maximize production from unconventional shale plays. He's written more than a dozen articles on the basics of the subject and has over a dozen patents or patent applications for methods and materials used in the process. So it's no wonder the Society of Professional Engineers named him a "Legend of Hydraulic Fracturing." He's another reason why Burleson Cooke is the energy law firm the energy industry goes to for unconventional expertise.
